Subject: Secondary MCL exceedences from 1st private well results

This data is **NOT VALIDATED YET!**

Attached are the results Deliberative Process/Ex. 5 These are total metals results from private alluvial wells close to the Animas, in the vicinity of Durango. Once these results are in SCRIBE, you can match up sample stations/ numbers with the lab results via SADIE & the Gold King Mine Operations viewer. Deliberative Process/Ex. 5

Deliberative Process/Ex. 5
Deliberative Process/Ex. 5 The codec for the sample number is:

GKM (the site)

TW (tap water) or PW (public water supply, well supplies multiple residences)

Xx –sample number issued in Durango,

_MMDDYY sample collection date – these samples were collected Saturday & Sunday

From the EPA OW web site:

“National Secondary Drinking Water Regulations (NSDWRs or secondary standards) are non-enforceable guidelines regulating contaminants that may cause cosmetic effects (such as skin or tooth discoloration) or aesthetic effects (such as taste, odor, or color) in drinking water. EPA recommends secondary standards to water systems but does not require systems to comply. However, states may choose to adopt them as enforceable standards.”

Thanks for your good cheer and dedication to this challenging response.

Dave Christenson,

ESAT & Superfund Records contracts Project Officer

(303) 312-6645

Vice President,
